DETAILED ACTION

This is in response to application No. 09/469834, dated December 22, 1999.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-8, and 12-22 drawn to the booting up a computer from a remote location, classified in class 713, subclass 2.
 - II. Claims 9-11, and 32-37 drawn to the installation of software that is performed in one or more computers within a network of multiple computers, classified in class 717, subclass 176.
 - III. Claims 23-31, and 38-40 drawn to determining the amount of use of the selected information or a cost associated therewith, classified in class 705, subclass 52.
2. Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the following instant case:

invention I has separate utility such as booting a computer from a remote location;

invention II has separate utility such as loading an application on a computer from a remote server;

invention III has separate utility such as charging for the usage of an application. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
